

## **AMENDMENTS TO THE CLAIMS**

The listing of claims will replace all prior versions, and listings, of claims in the application.

### **Listing of Claims**

1. (Currently Amended) An image display device comprising:

a main display body provided with

a display portion for presenting an image,

a first loudspeaker for reproducing sounds of low frequency,

a second pair of loudspeakers for reproducing sounds of middle and high frequencies, and

a duct for improving a low frequency sound property of the first loudspeaker;

and

a stand for supporting the main display body, wherein

the stand has a portion that is opposite to an outlet of the duct.

2. (Previously Presented) The image display device as defined in claim 1, further comprising a housing having the first loudspeaker and the second pair of loudspeakers therein, the housing having a plurality of through holes in a first area corresponding to an aperture size of each loudspeaker and a plurality of blind holes in a second area surrounding the first area, wherein

the second area for the first loudspeaker is different in peripheral shape and/or size from the second area for each of the second pair of loudspeakers.

3. (Currently Amended) The image display device as defined in claim 1, wherein an aperture size of the first loudspeaker is larger than that of each of the second loudspeakers.

4. (Currently Amended) The image display device as defined in claim 2, wherein a ratio of a total opening area of the through holes to the first area for the first loudspeaker is larger than ~~that of the first area~~ ratio for ~~each of~~ the second pair of loudspeakers.

5. (Currently Amended) An image display device comprising:  
a main display body provided with  
a display portion for presenting an image, and  
a housing having  
a first loudspeaker for reproducing sounds of low frequency,  
a second pair of loudspeakers for reproducing sounds of middle and  
high frequencies, and  
a duct for improving a low frequency sound property; and  
a stand for supporting the main display body, ~~and~~  
~~a housing having the first loudspeaker and the second pair of loudspeakers~~, wherein

the housing has a plurality of through holes formed in a first area corresponding to an aperture of each of the loudspeakers and a plurality of blind holes formed in a second area surrounding the first area, and

the second area for the first loudspeaker is different in peripheral shape and/or size from the second area for each ~~second loudspeaker~~ of the second pair of ~~loudspeaker~~ loudspeakers.

6. (Currently Amended) The image display device as defined in claim 5, wherein the first and second loudspeakers are provided in the main display body with the first loudspeaker mounted in a lower portion or an upper portion of the main display body and ~~one~~ each of the second loudspeakers arranged respectively on left and right sides of the first loudspeaker.

7. (Currently Amended) The image display device as defined in claim 5, wherein the first loudspeaker and the second pair of loudspeakers are mounted on the stand with the first loudspeaker placed at a center and ~~one~~ each of the second loudspeakers arranged respectively on left and right sides of the first loudspeaker.

8. (Previously Presented) The image display device as defined claim 5, wherein an aperture of the first loudspeaker is larger than that of each of the second pair of loudspeakers.

9. (Currently Amended) The image display device as defined in claim 5, wherein

a ratio of a total opening area of the through holes to the first area for the first loudspeaker is larger than ~~that of~~ the ratio for the second pair of loudspeakers.

10. (Previously Presented) The image display device as defined in claim 2, wherein an aperture size of the first loudspeaker is larger than that of each of the second loudspeakers.

11. (Currently Amended) The image display device as defined in claim 3, further comprising a housing having the first loudspeaker and the second pair of loudspeakers therein, the housing having a plurality of through holes in a first area corresponding to the aperture size of each loudspeaker and a plurality of blind holes in a second area surrounding the first area, wherein

a ratio of a total opening area of the through holes to the first area for the first loudspeaker is larger than ~~that of~~ the ratio for ~~each of~~ the second pair of loudspeakers.

12. (Previously Presented) The image display device as defined in 6, wherein an aperture of the first loudspeaker is larger than that of each of the second pair of loudspeakers.

13. (Previously Presented) The image display device as defined in 7, wherein an aperture of the first loudspeaker is larger than that of each of the second pair of loudspeakers.

14. (Currently Amended) The image display device as defined in 6, wherein  
a ratio of a total opening area of the through holes to the first area for the first loudspeaker is  
larger than ~~that of~~ the ratio for the second pair of loudspeakers.

15. (Currently Amended) The image display device as defined in 7, wherein  
a ratio of a total opening area of the through holes to the first area for the first loudspeaker is  
larger than ~~that of~~ the ratio for the second pair of loudspeakers.

16. (Currently Amended) The image display device as defined in 8, wherein  
a ratio of a total opening area of the through holes to the first area for the first loudspeaker is  
larger than ~~that of~~ the ratio for the second pair of loudspeakers.
